EDUCATION

Honours Bachelor of Science, Software Engineering Specialist Co-op
University of Toronto Scarborough, Scarborough, ON

Sep 2020 – present

- **Awards:** Entrance Scholarship \$2000, English Awards in Grade 8, and Grade 10-11, Dean's List 2021/22

RELEVANT COURSEWORK

Software Engineering Assignment - Calypso
University of Toronto, Toronto, ON, CSCC01

May 2023 – August 2023

- Learned React efficiently and quickly in a group project, to help successfully develop and a working application that helped clients buy and sell various forms of art.
- Debugged and fixed issues relating to both frontend and backend, allowing for a smooth agile workflow for all members.

Programming On The Web Assignment - FEIN
University of Toronto, Toronto, ON, CSCC09

September 2023 – December 2023

- Learned HTML, CSS, and new React concepts and applications of code to create a functional stock paper trading application with an appealing user interface.
- Applied concepts of web development and security, including the use of express, sessions, and cookies.
- Discovered, researched, and applied concepts of real-time communication using sockets.

EXPERIENCES

Rev Captionist

March 2020 – July 2021

REV, Austin, Texas, United States

- Created captions using proper grammatical form and spelling, so that customers would quickly receive professionally captioned videos and in turn received positive reviews from customers.
- Paid great attention to detail and corrected any mistakes that other editors may have made to ensure that clients' videos were perfectly captioned.
- Researched customers' and clients' companies, effectively creating captioned videos with correctly typed words from companies' vocabulary.

Software Engineer Co-op

January 2022 – August 2022

JDRF Electromag, 31 Lakeshore Rd. E Mississauga, Ontario

- Wrote and ran unit tests to test correct code functionality, and in turn allowed for supervisors to find bugs.
- Researched, designed, and implemented a testing tool used to test application functionality, allowing for co-workers and supervisors to test application features and functionality.
- Helped develop and create specific additions to a smart lighting application's user interface, resulting in the completion of several work completion targets.
